
GO: . PolyA Tail (Day13 vs Day2)
vesicle−mediated transport
regulation of cellular component organization
establishment of protein localization
cellular catabolic process
protein catabolic process
ubiquitin−dependent protein catabolic process
modification−dependent protein catabolic process
modification−dependent macromolecule catabolic process
monocarboxylic acid metabolic process
determination of adult lifespan
endocytosis
defense response to bacterium
response to bacterium
regulation of cellular component biogenesis
regulation of autophagy
